## IMPORTANT ANNOUNCEMENT FOR CLIENTS AND FAMILY MEMBER CAREGIVERS

### COVID-19 VACCINES

For Individuals with Disabilities and Family Member Caregivers

We have good news to share!

COVID-19 vaccines have now been authorized and are available to individuals with disabilities AND the family members who care for them.

In an effort to protect the health of those we serve, we encourage you to contact your Regional Center and ask for a letter showing the consumer's name, ID number, and the names of their family member caregivers. This letter is required documentation in order to be vaccinated for COVID-19. It is important that you reach out to your Regional Center case manager to find out when this authorization can be prepared for you.

We want every member of our community to be safe so that we can all be together again as soon as possible! Please share this news, and follow up to secure this required documentation to secure your vaccine.

For additional questions and information about the COVID-19 vaccine, visit the CDC website at:
